

BRENNAN JONES

Email: brennanjones@acm.orgWebsite: brennanjones.com

I am a human-computer interaction (HCI) researcher with experience working on human-AI interaction; technologies for in-person and distributed communication and collaboration; and augmented, virtual, and mixed reality (VR/AR/MR) interfaces. I research, design, and evaluate user experiences for technologies that improve people's lives and bring people together. I am experienced in conducting user studies and foundational research in HCI using methods such as interviews, field studies, lab experiments, survey research, and ethnographic methods, to understand user behaviours and technologies' impacts on factors such as group collaboration, awareness, and presence. I published at top-tier HCI venues, including ACM CHI, CSCW, DIS, and IEEE ISMAR. I am both a researcher and a builder, with experience in full-stack development, and comfortable embracing a variety of tools to build prototypes. I have a rich range of experience in front-end web development, back-end server coding, AR/VR development, mobile app development, and robotics programming. I like to blow minds and warm hearts.

Past:

Postdoctoral (Visiting) Researcher – w./ Dr. Stefan Scherer & Dr. Yan Xu Apr. 2022 - Mar. 2024
Meta – Reality Labs Research (RL-R), Redmond, WA, USA

Designed, prototyped, and studied novel interfaces for context-aware human-AI interaction on smart glasses and wearable augmented reality (AR). Designed and built a prototype of a conversational AI agent and ran a one-month field study to understand the user value and users' needs from conversational AI agents running on smart glasses. Helped analyze data from a large-scale three-month diary study with several hundred participants, helped synthesize the results into a framework to inform the design of context-aware AI systems for smart glasses, and later co-ran a multi-stage online interview study to derive further design recommendations. Collaborated with AI and machine learning (ML) engineers to design data-collection efforts to train ML models, including a campaign to collect egocentric video as part of Project Aria (<https://www.projectaria.com/>). Collaborated with designers to help translate research findings into design decisions. Collaborated with engineers and designers in hackathons to help them explore new system prototype and design ideas. Mentored two research interns and five research assistants, prepared two patent applications for novel interface designs, and published three academic papers.
