I am a human-computer interaction (HCI) researcher with experience working on augmented, virtual, and mixed reality (VR/AR/MR) interfaces; social computing; human-AI interaction; context-aware and ubiquitous computing; technologies for remote and hybrid work; technologies for connecting friends and family members; and emergency-response technologies (search and rescue, emergency video calling). I research, design, and evaluate technologies that improve people's lives and bring people together. I graduated with a Ph.D. in Computer Science from the University of Calgary in June 2021, and now work as a Postdoctoral Researcher at Meta Reality Labs Research. I am experienced in conducting user studies and foundational research in HCI using methods such as interviews, observations, lab experiments, survey research, and ethnographic methods, to understand user behaviours and technologies' impacts on factors such as group collaboration, awareness, and presence. I published at top-tier HCI venues, including ACM CHI, CSCW, DIS, and IEEE ISMAR. I am both a researcher and a builder, with experience in full-stack development, and comfortable embracing a variety of tools to build prototypes. I have a rich range of experience in front-end web development, back-end server coding, AR/VR development, mobile app development, and robotics programming. I like to blow minds and warm hearts.
