

BRENNAN JONES

Email: brennanjones@acm.orgWebsite: brennanjones.com

My research in human-computer interaction (HCI) and computer-supported cooperative work (CSCW) focuses on **designing interactive systems for social situation awareness in human-human and human-agent communication**. I explore how technology can identify and properly support appropriate information transmission in communication, such as when interacting with other individuals (e.g., teleconferencing, distributed collaboration) and with anthropomorphized agents and AI tools (human-agent communication). My work aims to **make technology-mediated communication richer and more equitable for people in different circumstances** and **foster effective long-term human-AI partnerships** to help people achieve their goals. Much of my work is community grounded and done in collaboration with non-profit organizations and industry collaborators. I have published at top-tier HCI venues including ACM CHI, CSCW, DIS, and IEEE ISMAR, mentored several talented and highly motivated individuals, and taught HCI at the graduate and undergraduate levels.

Postdoctoral (Visiting) Researcher – w./ Dr. Stefan Scherer & Dr. Yan Xu Apr. 2022 - Mar. 2024
Meta – Reality Labs Research (RL-R), Redmond, WA, USA

Designed, prototyped, and studied novel interfaces for context-aware human-AI interaction on smart glasses and wearable augmented reality (AR). Designed and built a prototype of a conversational AI agent and ran a one-month field study to understand the user value and users' needs from conversational AI agents running on smart glasses. Helped analyze data from a large-scale three-month diary study with several hundred participants, helped synthesize the results into a framework to inform the design of context-aware AI systems for smart glasses, and later co-ran a multi-stage online interview study to derive further design recommendations. Collaborated with AI and machine learning (ML) engineers to design data-collection efforts to train ML models, including a campaign to collect egocentric video as part of Project Aria (<https://www.projectaria.com/>). Collaborated with designers to help translate research findings into design decisions. Collaborated with engineers and designers in hackathons to help them explore new system prototype and design ideas. Mentored two research interns and five research assistants, prepared two patent applications for novel interface designs, and published three academic papers (with another under preparation).

User Experience (UX) Researcher III
